About This Content

The Quad Lake Pass grants access to the next 4 lake add-ons upon their release.

- Lake Williams, set in California and surrounded by a backdrop of dry arid land and forest-covered steep hills, is home to 7 species of fish including largemouth & smallmouth bass.
- Jezioro Bestii in Poland is all about the huge predator fish found in its rich natural environment. This lake is home to huge northern pike, perch & zander.
- Lake Arnold in Tennessee provides a range of fishing opportunities. This lush environment with submerged vegetation contains 10 species of fish including spotted bass & walleye.
- The fully-licensed Gigantica Road Lake is fast catching up the Gigantica Main Lake for the size of the carp that reside there, but features a much higher stock level.

Four fantastic venues, one great price! Requires Fishing Sim World core game, sold separately.
