About This Game

LEAD YOUR TEAM TO VICTORY

Step into the shoes of sports manager and lead your pro cycling team through a challenge-packed 2018 season. Compete in over 200 races across 500 stages around the world, including famous Tours such as La Vuelta and the iconic Tour de France.

It's up to you to make all decisions for your team: hiring the best cyclists and staff, contract negotiations, sponsoring, race scheduling, training... During the race, choose the finest tactics to lead your riders to victory. Play solo or online multiplayer in leagues or clans with up to 16 players and prove to everyone who is the best pro cycling manager!

NEW FEATURES

- Advanced contract and negotiation management in Career mode with in-depth transfer and recruitment mechanics.
- Deeper progression system in Pro Cyclist mode, with more possibilities than ever to personalize and build your cyclist.
- Enhanced in-race immersion with many improvements, including bigger breakaways and more realistic and aggressive AI during sprints.

Title: Pro Cycling Manager 2018
Genre: Simulation, Sports
Developer:
Cyanide Studio
Publisher:
Focus Home Interactive
Release Date: 28 Jun, 2018

a09c17d780

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7/8/10 (64-bit)

Processor: AMD/Intel dual-core 2.5 GHz

Memory: 4 GB RAM

Graphics: 512 Mo, ATI Radeon HD 5570/NVIDIA GeForce GT 240/Intel HD 4600

Network: Broadband Internet connection

Storage: 11 GB available space

Additional Notes: INTERNET CONNECTION REQUIRED FOR GAME ACTIVATION AND ONLINE GAME

Is the game perfect? No. Are there bugs? Yes.

But, is the game still enjoyable?? Hell yes. Bugs/issues aside, the game is the amazing and a lot of fun (granted it probably requires you to be at least somewhat a cycling fan. I've been playing the game for about 10 years now and while there are always issues, it's still a gem of a game. If you can find the game somewhere for a cheaper deal, don't hesitate picking it up.

Also, do make sure to get the PCMdaily database packs as they sure add a lot to realism.. Better than 2017 but buggy. Once they iron out the bugs it will be good.

Main improvements for me:

Better career mode and team building

Tougher more realistic racing, playing on hard instead of extreme and have challenge.

. Why does my game never save? I hate it!!!!!!! Fix it!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! I'm sorry but I had to refund the game, People recived the game for free before it came out and they leave good reviews but honestly day of when the game came out ive seen some crazy bugs and♥♥♥♥♥♥that really annoyed me from 2017 soo NO I will not support a game that is a copy and paste excpet from a few UI changes I have mods for 2017 that make the game 2018 soo no big deal I will buy PCM2018 but not for the full price thus is why I refunded it I will wait for a sale then get it sorry PCM2018. This is a great update of an awesome game. Sports games are the only thing I'd ever play, and for me, PCM is the best sports game I've ever run. After playing the 1976 Bally Midway Tornado Baseball years ago, I was forever hooked on sports gaming. But, since back then, I have never seen anything close to PCM for its ability to recreate the race environment on the road, to give quality rider graphics, but most of all for how easy it is to change the game in nearly every way – I've created a dozen new player faces and 100s of new teams and 1,000s of new riders, transformed the basic rules, completely rewritten race schedules, and taken races everywhere.

Forget the football pitch with its 22 little dots moving across a completely green screen – what a drab waste of time.

Yearly updates with any sports game depends mostly on technology improvements. PCM has done as well as any sports game I've seen on improving each year. This year has a much sharper race interface (Thank You!). And a more stylish team management system. The multiplayer races are great too and vastly improved from just a few years ago.

. Great game, if you are a fan of cycling you will enjoy this a lot.. just look after the bugs that are there, but most of them are not of importance for the game play itself.

Of course there are issues that can be better, as in most other games, but for cycling this is the best in the market.

You can play and develop one driver or a whole team, with a lot of possibility's to develop the best out of them.

and.. keep in mind that you can not win all the races... just the same as in real life ;-) HAVE FUN !!!

This game is fantastic, and I would definitely recommend buying this game (or a previous PCM game) if you are a cycling fan. Make sure to download a "real name" database from the workshop, they are an absolute must for me!

There are some real improvements over the last PCM I played (2016). Gameplay during races feels much better, it is now a lot harder to win. Races in pro rider mode are much more entertaining with the rider development where you gain xp for completing "race goals".

While these improvements are significant from PCM 2016 and probably PCM 2017 I am not sure they justify the full retail price for what feels like the same game. The commentary during races has now been the same for many years, and by now has become very annoying!

I bought it during a sale with 75% off and that was definitely worth it.

. As someone who likes sport sims and enjoys the sport of cycling (and rides to work), i find this game quite relaxing and easy to play while doing other stuff. The only downside is the game is essentially the same as it was 10 years ago, with minor tweaks to career mode and the addition of pro cyclist mode.

Note: Pick Team Sky or you will lose.. Played this for a few hours now and had a blast so far. Totally immersive if you love cycling and some great mods available. It's the first version of the game I've played so can't really advise either way if you already have 17. But anyone who likes cycling should be getting this. Only slight issue so far is it seems a little easy, especially the levelling up in pro cyclist mode. It's tough to win races at the start at least and it was a real buzz when I got that first win. Few graphical bugs here and there but no crashes thus far. Strong recommend from me.. Every 5th game crashes, of unknown reason often 3-10 km before finish line. Pretty annoying. Shouldnt be an issue with a 5th year game that has now been released for some while.. More in-depth review will follow in the future. This is my first PCM since 2011, but from videos, other reviews and comments it's easy to tell that there are not that many obvious new features in this edition. However, one thing quite a few people mentioned and that is actually noticeable is a significant AI improvement, one of the most important and, historically, most problematic parts of the game. I believe that this alone is worth buying the game if you're enjoying cycling and management games. At least I, in the few races I've played so far (waiting until a few more patches and a complete database before I start a career), had a lot of fun - the game feels challenging, the AI decisions mostly feel realistic, sprints are a lot better than they were years ago, and one thing these games have always done right was catching the atmosphere of an intense cycling race. It's no less in this edition.. This game never gets any better with regards to the bugs. Too much beard hair in the software. Try more programming and less time in the bathroom working on your silly beards. Why is this the only game on steam that is continuously release without actually being ready? I'm gonna ask for a refund.
